

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements Not Met for Pueblo of Acoma Main (PWS# 063501001)

Our water system violated a federal drinking water monitoring requirement during the past year. Even though this was not an emergency, as our customers, you have a right to know what happened and what we are doing to correct this situation.

What happened?

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. From **Sampling Period (January-March 2023)** we did not take the required sample to monitor for radionuclides and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?

- There is nothing you need to do at this time. You do not need to boil your water or take other actions.
- You may continue to drink the water. If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.

What is being done

Samples for April- June have already been taken and submitted for testing.

For more information, please contact: Sharlene Phillips 505-552-5131 or Marc Jaure 505-803-0800.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
